

MHP
2020 INCOME LIMITS FOR AFFORDABLE UNITS

Note: These income limits are based on U.S. Department of Housing and Urban Development (HUD) income limits for 2020, which are effective until new income limits for 2021 are published by HUD (typically in mid-to late-March of 2021).

At least 20% of the units in an MHP-financed project must be affordable to households earning no more than 50% of the area median income, or at least 40% of the units must be affordable to households earning no more than 60% of the area median income, or at least 50% of the units must be affordable to households earning no more than 80% of the area median income. Alternatively, at least 25% of the units in each project must be rented to households earning less than 80% of the median area income, provided that the maximum allowable restricted rents are at least 10% below comparable market rents. The MHP requires that tenants in affordable units meet income-eligibility guidelines, and also requires that the rents for the affordable units not exceed the Maximum Allowable Rents published annually by the MHP. "TC" refers to Multifamily Tax Subsidy Income Limits and are to be used for projects funded with tax credits. Please contact the MHP for more information about determining the income-eligibility of tenants. Here are the current income requirements for new tenants in affordable units:
